

BAH SERIES by Detroit Radiant Products Co.

ELECTRIC, HIGH INTENSITY, INFRA-RED RADIANT HEATERS

QUARTZ-RAY INFRA-RED ELECTRIC RADIANT HEATERS

Electric infra-red heaters are the cleanest method of heating, taking nothing from the air and adding nothing to the air. They are ideal for applications where gas is not available or impractical. Electric infra-red heaters are the answer to applications where gas and/or ventilation is not available.

Typical Applications

- Commercial Applications
- Patios
- Shipping Docks
- Shop Office Areas
- Spot Heating
- Industrial Applications
- Churches
- Entrance Ways
- Vestibules
- and many more!

Product Features

- Voltage inputs of 120, 208, 240 and 575.
- 6 models ranging from 0.5kw to 4.0kw.
- Mounts in any position.
- Pollution free; no venting required.
- Produces virtually instant heat.

⚠ NOT FOR RESIDENTIAL USE

SPECIFIC QUARTZ-RAY ADVANTAGES

Savings - A custom-tailored Quartz-Ray installation can economically meet your heating needs for new construction or retrofitted for existing facilities - producing clean, even, energy-efficient heat.

Control - A custom tailored Quartz-Ray heating system designed for your particular needs will provide heat when you want it; where you need it.

Ease of Installation - Special features built into every Quartz-Ray electric infra-red heater mean ease of installation in a new construction or retrofit application.

Comfort - Quartz-Ray electric heaters quietly focus energy efficient infra-red rays on the floor area, thus maintaining the required comfort levels for people and work-in-progress, while at the same time, lowering the temperature at the ceiling.

Condensation - Quartz-Ray heating systems eliminate potential corrosion problems with any stored steel products by keeping temperatures above the "dew point."

Noise - Since there are no fans, blowers or moving parts, a Quartz-Ray heating system reduces overall workplace noise levels.

BAH SERIES DIMENSIONS & TECHNICAL INFORMATION

DIMENSIONS & TECHNICAL INFORMATION

HEATERS ARE DESIGNED TO MOUNT QUICKLY AND EASILY.

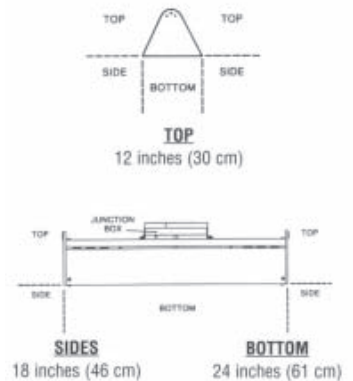

CHAIN MOUNTING

CEILING OR WALL SURFACE MOUNTING

MB-1 Optional mounting bracket set, 2 pieces.

CLEARANCE TO COMBUSTIBLES

Mount bottom of heater 8 feet above grade of floor.

NOTE: Brooders are exempt from above grade or floor clearances, all other clearances must be maintained. Safety legs are required for all brooder models. Please specify when ordering. Clearances are measured from the radiant surface and/or heater bottom to the nearest combustible surface. It is essential that the position and angle of the installation avoids any possibility of curtains, draperies or other flammable materials coming in contact with heater.
